Degree Plan

Transfer Credits

Benefits

Checklist

- Transfer Credit Tool Screen

Transfer Credit Tool

A wireframe of the Transfer Credit Tool screen. It consists of four vertically stacked rectangular boxes. The first box contains the text 'Enter Previous Institution'. The second box contains the text 'Enter Course / Training'. The third box is shaded gray and contains the text 'Check Transfer'. The fourth box contains the text 'Results: Transferable Credits'.

2. Functional Requirements

- User authentication (signup, login, logout)
- CRUD operations for degree plans and course lists
- Transfer credit lookup using external API integration
- Benefit comparison tool (GI Bill, Yellow Ribbon)
- Dashboard navigation between features
- Deployment pause/resume option (save progress)
- Data persistence (SQLite/PostgreSQL backend)
- Input validation and error handling
- Secure session handling

3. User Stories

1. As a student veteran, I want to log in with my VA or school credentials, so that I can securely access my academic and benefits information.
2. As a transferring student, I want to enter my completed courses and military training, so that I can see how many credits will transfer to my new school.
3. As a service member who may deploy, I want to pause and resume my degree plan, so that I don't lose my progress if I need to step away temporarily.
4. As a veteran using the GI Bill, I want to compare benefit eligibility at different schools, so

that I can make the most cost-effective decision.

5. As a student balancing family and work, I want to see a clear dashboard of tasks (checklists, documents needed), so that I can stay on track without confusion.

4. User Journey Flow

1. User opens the app → sees Login screen.
2. Logs in successfully → redirected to Dashboard.
3. Dashboard shows Degree Plan, Transfer Credits, Benefits, Checklist.
4. User selects 'Transfer Credits' → inputs prior courses & training.
5. System displays transfer equivalency & degree progress impact.
6. User checks 'Benefits' → compares GI Bill & Yellow Ribbon across schools.
7. User updates plan → saved to database.
8. User logs out → session ends securely.
